

Once admitted and enrolled in NCU courses, you will receive an email with attached document that allows you to create an account in our USOS system (University Study-Oriented System). Just follow the instruction, create an account and please remember the password you created. It is important that you do so as soon as possible.

The NCU account allows you to log into the USOS system, Moodle platform and install Teams.

After creating your NCU account, go to <https://skrypty4.uci.umk.pl/uslugi/?lang=en>. From this central point you can start using your student email account, platform Moodle and install Teams <http://office365.umk.pl/> (it is essential to have an NCU Teams account for your classes).

If you encounter any technical problems, please contact:

USOS - email: usos@umk.pl

Moodle - email: moodle@umk.pl

Teams - email: o365@umk.pl
