

**Rules of preliminary recruitment for foreign study mobility  
in the summer semester of 2021/2022  
project KA131 2021  
ANNEX No. 3**

Due to the receipt of new guidelines from the Erasmus+ National Agency, the following changes are made to point 46:

1. The sentence:

„Sustainable means of transport include:

- collective public transport, i.e. railway, bus, ship/ferry ,
- a car, provided that at least two people travel in it”.

is replaced by the following:

"Erasmus+ - recognized ecological means of transportation are: bus, train, bicycle, carpooling - shared travel of people on the same route, for the same purpose, in the car of one of the co-passengers (more information about the system available at: <https://pl.wikipedia.org/wiki/Carpooling>).

Journey by: **train, ship (boat, ferry), car, motorcycle** is not considered ecological."

2. The following sentences are added:

The basis for determining the number of travel days with the individual support category grant for a mobility participant moving under the eco-journey option will be the dates of their travel, i.e. start date and end date (departure/arrival) in both directions, presented in the travel documents confirming the use of ecological means of transport.

In each case, the student must provide evidence to Nicolaus Copernicus University that the number of travel days requested (travel days grant) and accounted for in the individual eco-journey travel support category was necessary to cover the distance between the locations of the sending and the receiving institutions.

**The student shall be paid only for the number of travel days covered by the travel documents, and the grant for a day of travel is awarded as a lump sum, regardless of the number of hours of travel on a given day and the number of kilometers for a given day and the number of kilometers, e.g. if, on the basis of the European Commission's distance calculator, at the student's request the grant is awarded for 4 days of a return journey, but it results from the travel documents that the route was completed in 2 days, the grant for the remaining granted 2 days of the journey shall be returned by the student.**

A student whose travel dates, regardless of the means of transport, coincide with the mobility start and end dates listed in the confirmation of stay issued by the host university, cannot receive a grant (scholarship) from the category of individual support for travel days connected with the eco-journey option.

The student's travel days do not count towards the minimum duration of the mobility and the mobility capital used.

**A student who does not receive funding under the Individual Support and Travel category of the Erasmus+ Program (so-called "zero grant") cannot receive €50/increased lump sum for travel costs by environmentally friendly means of transport.**
